MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Regulatory Issuances

1. One of the points noted by you on your return from the Field was the failure to get current regulations to the Field. I have felt the root of this problem is in Headquarters in the Regulatory Staff itself. As an example, this Office probably has the most nearly complete set of regulations outside of the Regulations Control Staff, and our set is probably the equal of theirs. Time and again we find it is almost impossible to establish at any one point whether or not we have both the latest issuances and a complete set of the prior issuances.

2. On 27 August, [] sent a memorandum to the Acting Chief, Regulations Control Staff, suggesting a system adopted loosely from the Commerce Clearing House system, which we believe would cure the defects. After some discussion and some original agreements, we are now notified that the Regulations Control Staff does not agree with our proposal. We are not aware of any system of issuances, such as Commerce Clearing House, which does not use some sort of instruction sheet such as is here discussed. We believe some such system would do much to cure our past and current problems. Also attached is a copy of [] memorandum of 10 April on the same subject.
